

EMAIL MANAGER

Manage your emails in one simple click.

Email users are faced with a daily challenge to organise and manage their emails and other information available to them. Technologies envisioned to liberate us can swamp us in a wave of data and clutter.

inMailX Email Manager provides an efficient filing method, ensuring users are able to maintain the organisation of their sent and received emails:

- ✓ Ability to Send & File/Archive, Close & File/Archive
- ✓ Forced filing on send
- ✓ Customisable recently used filing locations
- ✓ Quick file to recent locations
- ✓ Subject editing when filing
- ✓ Disable Reply, Reply All and Forward
- ✓ Enhanced mail notifier

When used with its optional connectors for document management and file system integration, inMailX enhances Microsoft Office capabilities to file emails into third party document management systems, network file systems and other line of business applications (Worksite, Worldox, SharePoint, etc).

Let inMailX Email Manager increase your users' efficiency and help them take control of managing emails without losing any existing Outlook functionality.
